

JORGOS LED + RGB

Jorgos is an ultimate combination of beautiful design and perfect engineering at Imperial lighting. Its beautiful surface and lighting effects gives lighting and stage designers a tremendous possibilities to create visual effect at the stages like never before. It is perfectly suitable wide range of applications, such as music festivals, television and theatre.

Jorgos is a highly modular, triangle lamp – the more you combine, the more lighting effects you can get. The uniqueness and beauty of this lamp lies in the universal shape and great freedom in designing lighting effects. This products has been designed by Giorgos Stylianou-Matsis, one of the most talented and recognisable stage designers in Poland. Jorgos has already been recognised in several events, such as: Eska Music Awards 2017, Sunrise music festival 2017, Saturday Night Live Poland and Opening Ceremony of European Championship in Volleyball.

LED is the future

R2 lights have made it! We have managed to compromise the unique characteristic of Tungsten lamp with LED it is beautiful and eye-catching. Our LED solution entirely emulate beautiful dimming curve of Tungsten, colour temperature perfectly match with the halogen and CRI is above >97%! For R2 the Environment is a priority. The power consumption is 10 times lower than halogen! LED lifetime is more than 50.000h.

Product specification:

- Breakthrough Tungsten substitute
- RED shift effect
- 16 individually controlled Pixels
- 16 x 15W Tunable white
- 16x 2,5W RGB
- Total Power: max. 300W
- Max 240W
- Integrated electronics
- 230V/50Hz
- DMX In/Out
- OLED Display
- 0-100% smooth dimming
- Weight 10,0 kg
- Easy installation
- Available in any RAL colour
