

K3

LIGHT FOR THE UNREACHABLE

4,5W Power

360° Rotation
Individually adjustable

K3

The K3 is a compact and autonomous light fixture with three led spotlights.

Designed for maximum versatility K3 is equipped with a neodymium magnet and can be placed, fixed or hung from most surfaces or structures. Its 41cm length and its light weight, enhances K3's portability and widens its field of possibilities.

The accessory kit offers access to spaces which are more difficult to reach, thanks to the Velcro® straps, the magnetic counter plate and the metallic slings.

K3 is remote-controlled (RF equipped) and the three Cree XPG2 leds per spotlight can be mounted in RGB or CCT tunable white.
